Profile

Web developer graduated in Computer Systems and Network Engineering with back-end experience and advanced intermediate English. I am passionate about creating innovative and efficient solutions that meet the needs of users.

I am a team collaborator, and I am always willing to help my colleagues.

I am committed to continuous learning of new technological tools and to improve my English level.

Work Experience

Web App for learning English – Lingotter
March 2023 – September 2024
Role: Full-Stack Developer
Web application developed in Laravel for learning English in an interactive way and with gamified content. A server was configured in Digital Ocean and a domain was purchased in Cloudflare.

Academic projects
